QA AUDIT REPORT

dhanushpsoorya.pages.dev · Audited 13 Oct 2026

PRODUCTION REVIEW

Production Readiness Assessment

Ship blockers are SEO asset fallback (HTML returned for robots/favicon), mobile projects nav overlap at 375px, and resume horizontal scroll overflow. Fix those three before treating the site as crawl/share ready. Visual craft on desktop is exceptionally strong.

7.5	6.5	6.0	5.5	3.5
FUNCTIONALITY	VISUAL QUALITY	PERFORMANCE	ACCESSIBILITY	SEO / METADATA

TARGET ENVIRONMENT

Target URL	https://dhanushpsoorya.pages.dev
Framework	Vite 7 + React 19 + Framer Motion
Deployment	Cloudflare Pages (project dhanushpsoorya)
Viewports	375px, 768px, 1280px, 1440px

WCAG CONTRAST SAMPLES

Sample Pair	Ratio	Status
Beige #d4c6b9 on Black #171c1c	10.32:1	PASS
Sage #7a8b69 on Black #171c1c	4.69:1	PASS AA
Grey #706d66 on Black #171c1c	3.34:1	FAIL AA
Sage #7a8b69 on Beige #d4c6b9	2.20:1	FAIL (Borders)

CHECKLIST MATRIX

Area	Result	Notes & Findings
Navigation / Routing	Pass w/ notes	Pretty URLs work; *.html issues 308; skip + #facts/#contact/#profile resolve correctly.
Forms	N/A	No interactive contact or newsletter forms on the site.
Theme Toggle / FOUC	N/A	Single dark theme architecture; no light mode implemented.
External Links	Fail	Missing target="_blank" and rel="noopener noreferrer" on external anchors.
Responsiveness (375-1440)	Mixed	Home/projects clear overflow-x; resume overflows; projects nav overlaps at 375px.
Hamburger / Focus Trap	N/A / Fail	No hamburger menu present; wrapped floating dock used instead.
Keyboard / Focus Rings	Fail	Skip link exists; weak focus rings; closed submenu items remain tabbable.
Landmarks / Headings	Pass	header, nav, main, footer, and proper h1→h2 hierarchy present across routes.
Alt Text Quality	Pass	Hero, film strip, portrait, certificate, and project covers have descriptive alt attributes.

DEFECT LOG — PART I (P1 BLOCKERS & P2 HIGH PRIORITY)

BUG-01: SPA Fallback Serving HTML for Robots, Sitemap & Favicon

P1 - BLOCKER | SEO

Description: robots.txt, sitemap.xml, favicon.ico return HTTP 200 with text/html body identical to homepage (~796 B) due to Cloudflare SPA fallback.

Repro: GET https://dhanushpsoorya.pages.dev/robots.txt and inspect Content-Type header and response body.

Expected vs Actual: Expected real text/plain robots & XML sitemap. Actual: Full React HTML shell served for crawler files.

Fix: Ship physical public/robots.txt, public/sitemap.xml, and favicon files directly in web/dist output.

BUG-02: Wrapped Glass Nav Overlaps Intro Heading on Mobile

P1 - BLOCKER | Responsiveness

Description: On /projects at 375px, wrapped glass navbar flex-wraps onto a 3rd row, pushing dock down to clip h1 "Four separate pieces."

Repro: Open /projects at 375×812 viewport. Inspect dock position relative to top heading padding (7rem).

Expected vs Actual: Expected content clears header with ≥16px gap. Actual: Bottom edge of dock covers top letterforms.

Fix: Add dynamic --nav-offset CSS variable or raise .page-intro padding-top to match wrapped nav height below 800px.

BUG-03: Resume Page Forces Fixed Width Causing Mobile Viewport Overflow

P1 - BLOCKER | Responsiveness

Description: HTML Resume view overflows horizontally on phone screens. Scroll width is ~817px at 375px viewport because .page width is hardcoded to 8.5in.

Repro: Open /resume at 375px viewport width and pan horizontally across screen.

Expected vs Actual: Expected sheet scales or reflows without page overflow. Actual: ~2.2× horizontal scroll; header content clipped.

Fix: Set max-width: min(8.5in, 100%) on sheet container and scale padding dynamically with viewport.

BUG-04: Missing Open Graph, Twitter Cards, Canonical & Meta Descriptions

P2 - MAJOR | SEO

Description: No og:title, og:image, twitter:card, or link rel=canonical tags on any route. Social media shares display blank cards.

Repro: Inspect head element on /, /projects, and /resume. Search for Open Graph properties.

Expected vs Actual: Expected complete metadata and 1200×630 preview image. Actual: Only basic static title present.

Fix: Inject standard OG, Twitter, canonical, and favicon tags into index.html, projects.html, and resume.html.

BUG-05: Internal Navigation Links Point to *.html Triggering 308 Redirects

P2 - MAJOR | Functional

Description: Internal site navigation links explicitly target *.html URLs, causing Cloudflare Pages to issue 308 redirects to pretty paths.

Repro: Click Profile / Projects / Resume in header and observe Network tab 308 Permanent Redirect responses.

Expected vs Actual: Expected direct 200 OK navigation to pretty routes. Actual: Extra network latency hop on every internal click.

Fix: Update SiteChrome navigation components and footer CTAs to point directly to path URLs without .html extensions.

BUG-06: External Third-Party Links Open in Same Tab without Safety Attributes

P2 - MAJOR | Accessibility

Description: Third-party destination links (LinkedIn, GitHub, Coursera verification) open in the same browser tab without security attributes.

Repro: Inspect anchor tags in site footer and certification verification buttons.

Expected vs Actual: Expected target="_blank" rel="noopener noreferrer". Actual: Same-tab navigation removing users from

DEFECT LOG — PART II & TOP REMEDIATION CODE

BUG-07: Weak Focus Rings & Submenu Tabbing — P2

Issue: Skip link has outline:none. Closed Resume submenu items (View/Download) remain in tab order when hidden.
Fix: Add :focus-visible rings; set inert or tabIndex={-1} when closed.

BUG-08: Text Label Contrast Fails WCAG AA — P2

Issue: Grey label text #706d66 on #171c1c yields 3.34:1 contrast ratio (fails 4.5:1 minimum requirement).
Fix: Lighten grey labels to #A39E94 or use beige text (#d4c6b9).

BUG-09: Unoptimized Master Hero Image — P2

Issue: Hero JPEG is ~596 KB at 3120×4160 resolution without WebP variants, srcset, or lazy loading below fold.
Fix: Export WebP at 1600w/800w; fetchpriority=high on hero.

BUG-10: Small Mobile Touch Targets — P2

Issue: Nav links measure ~19-24px tall at 375px (WCAG requires ≥44×44px interactive touch target size).
Fix: Expand link padding and min-height to 44px on mobile viewports.

BUG-11: Touch Device Dropdown Usability — P3

Issue: Submenu relies on desktop hover; mobile touch relies on focus-within without explicit close control.
Fix: Add explicit click toggle + outside tap event handler.

BUG-12: Missing Schema & Touch Icons — P3

Issue: Lacks Person/WebSite JSON-LD structured metadata and apple-touch-icon assets.
Fix: Inject JSON-LD Person block and 180×180 touch icon.

TOP FIXES (COPY-PASTE SNIPPETS)

1. Static Robots & Sitemap Fix (web/public/)

```
# public/robots.txt User-agent: * Allow: / Sitemap: https://dhanushpsoorya.pages.dev/sitemap.xml # public/sitemap.xml <?xml version="1.0" encoding="UTF-8"?> <urlset xmlns="http://www.sitemaps.org/schemas/sitemap/0.9"> <url><loc>https://dhanushpsoorya.pages.dev/</loc></url> <url><loc>https://dhanushpsoorya.pages.dev/projects</loc></url> <url><loc>https://dhanushpsoorya.pages.dev/resume</loc></url> </urlset>
```

2. Mobile Nav Overlap & Touch Targets (css/site.css)

```
:root { --nav-offset: 5.5rem; } @media (max-width: 800px) { :root { --nav-offset: 8.5rem; } .navbar { gap: 0.75rem; } nav a { display: inline-flex; align-items: center; min-height: 44px; padding: 0.55rem 0.35rem; } .page-intro { padding-top: calc(var(--nav-offset) + 1.25rem); } }
```

3. Resume Mobile Sheet Overflow (css/resume.css)

```
.page { width: 100%; max-width: 8.5in; min-height: 11in; margin: 12px auto 32px; padding: clamp(1rem, 4vw, 0.7in); } @media (max-width: 700px) { .toolbar { flex-wrap: wrap; } .page { min-height: 0; } }
```

Audit Method Notes: Probes confirmed /projects and /resume return 200; *.html return 308. LCP PerformanceObserver entries empty in headless Edge; FCP ranged ~0.7–1.8s warm. Source: live HTTPS probes + Edge CDP screenshots + site.css / SiteChrome.tsx / resume.css source code review (13 Oct 2026).
